Title: **An act to introduce an International Undead Apocalypse Contingency Plan (IUACP) to ensure the longevity of the human race**

BE IT HEREBY ENACTED BY THE GENERAL ASSEMBLY OF THE UNITED NATIONS

Justification Clause: With diseases rapidly spreading and evolving into more and more deadly strains, it seems like only a matter of time before one of them develops with the audacity to wipe out millions and devastate civilization. We, as humans, have seen some such diseases as the Bubonic Plague in the Middle Ages and the Spanish Flu in the 20th Century. In more recent times, China has experienced Avian Flu and experienced first-hand the disorder caused when lethal diseases run rampant. Inevitably, either by work of man or by process of nature, a virus, parasite, or bacteria with reanimating capabilities will arise. The effects of an Undead Infestation anywhere would quickly spread into the surrounding countries and an Undead Infestation could become an Undead Apocalypse. We shall introduce a contingency plan for the event that one such apocalypse occurs.

Section I: All counties associated with the United Nations will abide by the following IUACP to ensure the safety of their people.

Section II: A committee will be established in order to facilitate and coordinate the IUACP.

Section III: Preparing- The IUACP committee shall gather and publish undead infection prevention materials and shall make this information public so that the public may be informed.

Section IV: Containment-Any and all countries affiliated with the United Nations suffering from an Undead Infestation must report said infestation to the IUACP committee, at which point the committee will coordinate containment and relief efforts from all countries able to provide aid. The utmost actions must be taken to prevent the spread of the Undead. Infected cities will be quarantined and use of aerial bombardment efforts will be applied as needed after evacuation of the living inhabitants. The IUACP shall also be responsible for closing and maintaining the border of infected countries. Nations suffering from Undead Infestation which are not members of the United Nations, but border nations that are, shall be quarantined via border control from the U.N. Member Nations.

Section V: Contingency- All countries associated with the United Nations shall agree that, in the event that their government is overrun by the undead, they shall overturn control of their government to the IUACP committee. The committee shall then levee any means necessary in order to return order to the infested country and prevent the undead from further spreading.

Section VI: This proposal will be enacted immediately after its passage.
