Author(s): **Jake Neal**

Title: **An act to plan for the security of Poland's future nuclear power plants with the implementation of a Nuclear Security Force.**

**BE IT HEREBY ENACTED BY THE GENERAL ASSEMBLY OF THE UNITED NATIONS**

Justification Clause: Poland plans to build its first nuclear power plant by the year 2020, with more planned to be built by 2030. No plan for the security of these plants has been proposed. Our proposal will implement a security team of 150 men at each location with a headquarters located in Warsaw, Poland.

Section I: The NSF will begin operations as of April, 1st 2016. This will give the NSF approximately 4 years to prepare for the opening of the first plant and create plans of defense.

Section II: This is necessary because there are nations and groups out to steal nuclear secrets. Without a defense force, these secrets would be left vulnerable to attacks from such groups.

Section III: Each member of this force will be issued an assault rifle and a pistol for the defense of these plants. There will also be mounted heavy machine guns and sniper towers for vantage points creating the ability to foresee any and all attacks.

Section IV: There will be exterior and interior defenses on all levels of the power plants.

Section V: These plans apply to all nuclear power plants that will be built in Poland.

Section VI: Be it hereby enacted by the general assembly of the United Nations.
