Title: An act to encourage incorporation of underwater turbines into new bridge construction by creating a U.N. committee that shares technological expertise

BE IT HEREBY ENACTED BY THE GENERAL ASSEMBLY OF THE UNITED NATIONS

Justification Clause: Every country of the world needs energy to function. There are many different ways to provide this energy without the use of fossil fuels. In order to continue at our current rate of energy use, we must turn to these other resources as our answer. This proposal, when passed, will help countries utilize their energy potential with the help of these space and capital saving turbines.

Section I: A committee will be created consisting of twenty representatives from member nations and will work in cooperation with the U.N. Commission on Sustainable Development.

Section II: There shall be no more than two representatives per member nation involved.

Section III: The purpose of this committee will be to encourage prospective countries to build such structures and provide them with both technological advice and assistance in implementing these projects.

Section IV: This proposal will go into effect Jan.1, 2014.
