Title: **An act to to bring peace to the world through a good faith effort with The Democratic People's Republic of Korea**

BE IT HEREBY ENACTED BY THE GENERAL ASSEMBLY OF THE UNITED NATIONS

Section I: This bill aims to make the world a much safer place than it currently is, for not only us but our children, and their children, and their children and even their children, by disarming all nations of the world in a very good faith agreement with the Democratic People's Republic of Korea.

Section II: All of the worlds Nuclear weapons, and any and all launching mechanisms for said weapons will be safely transported to the Democratic People's Republic of Korea by boat, at the expense of the Democratic People's Republic of Korea. Remember, this is a good faith effort to restore Best Korea to a place in high world standing. These nuclear weapons will be transported to a remote location in the mountains of the Beautiful Democratic People's Republic of Korea, many many many miles away from Shenyang, where they can be stored and disposed of safely. These nuclear weapons will then be disposed of in the safest way possible, and will never harm any of the allies of the Democratic People's Republic.

Section III: There is nothing more important than nuclear disarmament of the world to our great leader, dear, eternal leader, his holiness, Kim Jong-Un. Nuclear disarmament will make the world a much better place not only for citizens of the Glorious Democratic People's Republic of Korea, but for all the citizens of the world, by allowing us to move forward towards peace without the threat of a nuclear holocaust that would ultimately destroy the entire world.

Section IV: This proposal will go in to place and the first Nuclear weapons will start being shipped to the Democratic People's Republic of Korea no less than one month (30 days) after this proposal is approved. If a country does not comply with this new proposal, they risk economic and other various sanctions from the United Nations, as well as the Democratic People's Republic of North (best) Korea. All weapons will be disposed of very safely* using the best technology we see fit, by the best scientists North (read: best) Korea has to offer.

*by very safely we mean at the discretion of Kim Jong-Un and his Military Advisers
