Title: **An act to implement a suicide hotline in Sweden.**

BE IT HEREBY ENACTED BY THE GENERAL ASSEMBLY OF THE UNITED NATIONS

Justification Clause:

Section I: Statistically speaking, every person in this room has been affected by the pandemic: suicide. With suicide rates ever increasing around the world, the solution seems further from our grasp. Unfortunately, this mass killer has no clear solution. Some can hypothesize a solution, but the sad reality is no such solution exists. However, the possibility of preventing or lessening the amounts of suicide is tangible. Already implemented in the U.S., the idea of a "suicide hotline" can be among the top preventers for suicide. Sweden has among the top five suicide rates in Europe. Moreover, this "suicide hotline" is not used in Sweden, or any other European country. Through this "hotline" individuals can call for thoughts of suicides, planned suicides, or if any individual knows of someone's attempted suicide. Within the U.S., one hotline center received 50,000 calls within one month. This staggering number is evidence in proving that these hotline centers will be vastly used. This proposal will be implemented throughout all U.N. countries and can be supported by WHO, a U.N. organization.
