OFFICIAL PROPOSAL**

Proposal #: **4**

Assignment: **A**

Country: **Austria**

School: **Elkhorn MS**

City: **Frankfort**

Author(s): **Sasha Sairajeev**

Title: **An act to encourage the intake of products that helps prevent thyroid cancer due to the Chernobyl disaster in Ukraine.**

BE IT HEREBY ENACTED BY THE GENERAL ASSEMBLY OF THE UNITED NATIONS

Justification Clause: It was the 26th of April 1986. It all started off with an unexpected power surge. When this occurred, an emergency power shut down was called for but lead to an even larger power surge. Due to this, the reactor vessels were damaged causing steam explosions. During these events happening, a graphite moderator was exposed to the air thus igniting it. As it burned, it released radioactive material in the air contaminating anything in sight. Throughout all this chaos, the released material traveled toward Austria. Today, the effect of the Chernobyl disaster still affects Austria today in many ways. The lack of Iodine in Children's diets makes them more vulnerable to thyroid cancer and iodine deficiency disorders caused by the disaster. This proposal is to encourage the intake of products with iodine in it so it can make people less vulnerable to thyroid cancer.

Section I: When this proposal goes in to effect, percentage of residence that have thyroid cancer will decrease and in the future, the population of people who have thyroid cancer will decrease to the point that there will only be a few people with thyroid cancer.

Section II: Part of the proposal will add commercials broadcasted nationally about the importance of iodine and why you should consume it.

Section III: Markets in Austria should reduce the price of products high in iodine.

Section IV: Railroads should be built so that the neighboring countries can import products high in iodine.

Section V: We are requesting one million dollars for railroads and 500,000 dollars for supplying Austria with products with iodine.

Section VI: This proposal will go into effect immediately upon this passage.
