Title: **An act to unify the world through one global currency.**

BE IT HEREBY ENACTED BY THE GENERAL ASSEMBLY OF THE UNITED NATIONS

Justification Clause: Most of the countries around the globe have their own unique currency. Not only does this restrict trade but, when international travelers convert their money, the money loses almost half its value.

Section I: We propose to convert all countries included in the UN, to the DIGIDOLLARS digital money system. In order to accomplish this, we plan to partner with The Global Digital Currency Association (GDCA). The GDCA is a trade association of electronic money operators, digital currency exchangers, merchants and users. The money that the citizens already have will be transferred to DIGIDOLLARS of equal worth

Section II: Our objective is to create a more efficient global market by opening more countries to trading opportunities. This will, in turn, unite the countries and increase economic strength. The DIGIDOLLAR digital currency system will be an effective way to unite all UN countries.

Section III: This will cost around \$12,000,000. This money will be used to fund DIGIDOLLARS systems. Our partner, GDCA, will provide us with these funds.

Section IV: The set up for this program will begin immediately after passage. The DIGIDOLLAR program will be released to a predetermined group to determine its effectiveness. After we receive feedback of its progress, it will be released to the public in 2016.
