1 An act to implement a program that provides water purification systems and necessary training

2
3 **Be it hereby enacted by the General Assembly of the United Nations**

4
5 Justification Clause: Water is and always will be one of the most important resources a country can have. In
6 2011, 16.8% of the population had no access to clean water. They have frequent floods caused by tsunamis,
7 contaminating their water. They are classified as having a high risk of infection due to waterborne illnesses
8 by the CIA World Factbook. Though they can easily contract hepatitis A and E, typhoid fever, and
9 leptospirosis through their water, still 45.3% of the people don't have access to a sanitation facility.

10
11 Section I: Water purification systems, such as the M100 Chlorinator which is used by the global organization
12 WaterStep ©, will be installed in various communities. These water purification systems cleanse
13 contaminated water that carries disease-bearing pathogens.

14
15 Section II: Along with the sanitation systems, local people will be educated on the maintenance and usage of
16 these devices. In addition, they will be educated in the basics of water safety. This will allow local people and
17 governments to independently expand their own water filtration systems.

18
19 Section III: This proposal establishes a program, regulated by the UN, which will connect countries lacking
20 clean water with aid either from charitable organizations or foreign nations. They will provide the resources
21 and funding necessary to establish these sanitation systems.

22
23 Section IV: The exact provisions of the negotiation will be left up to the parties involved. The UN will regulate
24 the negotiations by mandating that the afore-mentioned criteria are met.

25
26 Section V: The opening of negotiations will enable all countries to gain access to clean water. It will be set up
27 as a pilot program in Bangladesh. If the program is successful, one year later it will be open to all countries in
28 need of water purification systems and water safety education.

29
30 Section VI: This proposal will go into effect six months from passage.
