1 An act to continue the usage of coal as the main power source in Poland

2

3 **Be it hereby enacted by the General Assembly of the United Nations**

4

5 Justification Clause: Poland relies on coal as a main power source. Coal powers about 85% of the electricity
6 in Poland. The coal mines in Poland have helped many people in getting jobs and using coal, which Poland has
7 been using for decades. It is not as expensive for Poland as using solar power or wind power.

8

9 Section 1: Currently the European Union has been trying to convince Poland that renewable energy sources
10 (like wind power, nuclear, solar, etc.) would be a better energy source than coal. However, for Poland to use
11 another energy source it would cost them even more money. Poland needs a reduction in pressure from the
12 European Union on switching from coal based energy sources.

13

14 Section 2: Poland has 59 operational coal plants and there are plans to make 13 more coal plants. These
15 coal plants have been increasing in efficiency every year. Also coal plants have been becoming more eco-
16 friendly in the sense that they are trying to create less pollution. Coal mines and coal plants also creates
17 jobs, which can help boost the economy.

18

19 Section 3: This proposal will not cost anything, because it is only continuing the coal mines and plants that
20 are already in Poland.

21

22 Section 4: This proposal will go into effect one month after passage.
