

...with a sustainable solution.

Chlorination

**kills 99.99% of bacteria**  
that cause sickness.

Developed countries, including the US,  
**use chlorinated water every day.**

With the WaterStep Water Purifier,  
**chlorine is readily available from salt**  
commonly found all over the world.

WaterStep is a 501(c)3 organization that empowers ordinary  
people to provide sustainable water solutions around the globe.

UNSAFE WATER IS A REALITY,

But with your help, it doesn't have to be.

### Benefits of Our Water Purifier:

- Operational in only five minutes
- Chlorinates more than 10,000 gallons of water per day
- Weighs less than 15lbs and fits into most carry-on bags
- Purifies drinking water at a cost of less than \$1 per person annually
- Produces virtually no waste
- By-products form a cleaning solution, which can be used to sterilize medical equipment and disinfect latrines

Accessories are available to build a complete mini-water treatment plant. This includes pumps, filters, solar panels, tanks and more. Visit [WaterStep.org](http://WaterStep.org) for all of our safe water solutions.

### The WaterStep Water Purifier is ideal for:

- Villages
- Schools
- Disaster Relief
- Medical Clinics
- Orphanages
- Churches
- Emergency Management
- Individual Needs
- Rural Applications

You may purchase a purifier for yourself, your business or your next trip overseas. Invest in WaterStep and help support our work of saving lives with safe water.

### A worldwide problem...

**875 million**

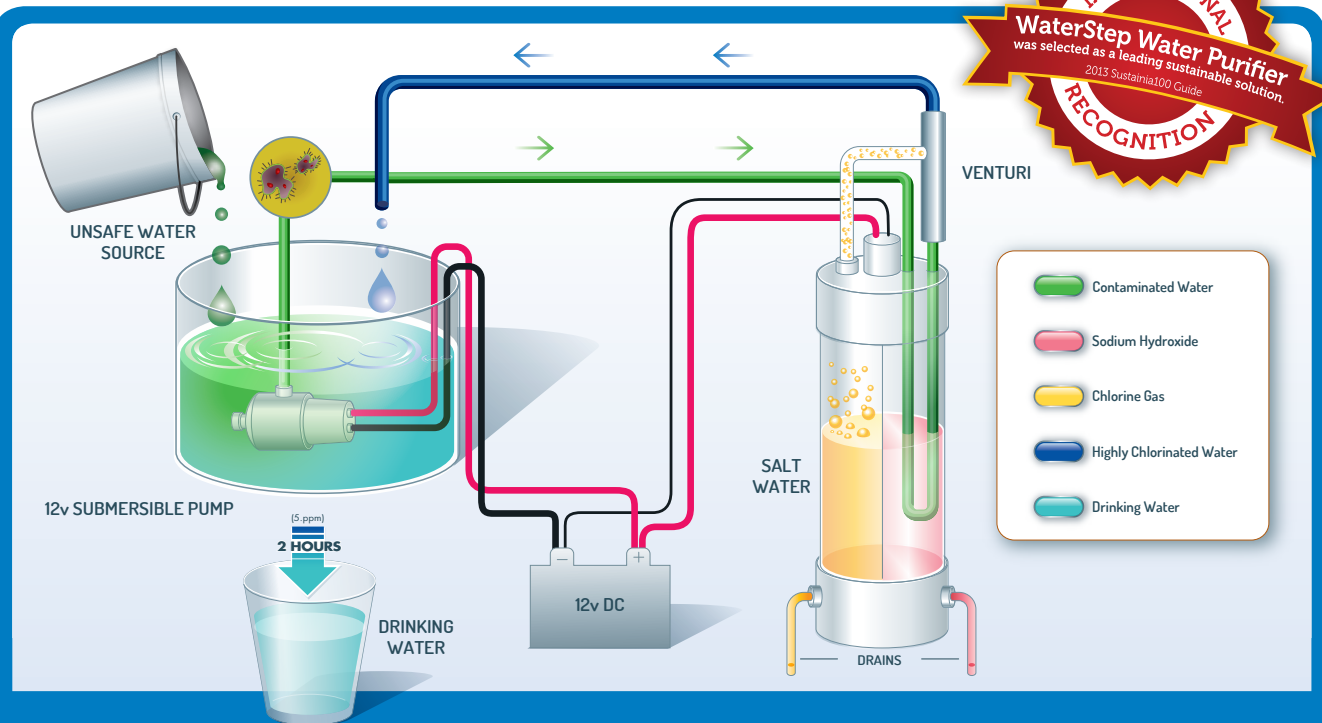

people around the globe live without safe water.

Unsafe water and poor sanitation account for

**80% of all sickness and disease in the world.**

**Every 20 seconds a child dies**

from illnesses caused by unsafe water and/or poor sanitation.

### The WaterStep Water Purifier Makes Water Chlorination Simple and Affordable.

All you need is a 12-volt battery, a handful of salt and five minutes.

Developed and tested by volunteer engineers from General Electric and the Louisville Water Company, the WaterStep Water Purifier packs life-saving power into a lightweight, easy-to-transport package.
