City: Louisville	

1 An act to impose sustainable energy upon Switzerland in order to reduce the risk of future nuclear calamities
2 and global warming
3

4 **Be it hereby enacted by the General Assembly of the United Nations**
5

6 Justification Clause: Switzerland harbors one of the most competitive and successful economies on the
7 planet. As global warming rises, its effects are beginning to interfere with their environmental status and one
8 of their major industries: tourism. 40.85% of our country's energy is nuclear, which is a partial cause to the
9 rapidly deteriorating conditions. Renewable energy sources are rarely apparent in our country, and if put into
10 use often, can become an eminent and reliable source of energy, as well as save a copious amount of wildlife
11 and stall global warming.
12

13 Section I: The UN would provide half the cost of the inspection of areas to decide where solar panels and
14 wind turbines should be placed.
15

16 Section II: The UN would provide money to pay for solar panels and wind turbines to make renewable energy
17 a more eminent source of energy for our country. Wind turbines are estimated at from a cost of \$3,000 to
18 \$15,000 each, and solar panels are estimated at a cost of \$1.94 per square feet.
19

20 Section III: The UN would aid in the first 10 checkups on the state of the solar panels and wind mills to
21 ensure their conditions.
22

23 Section IV: This proposal would go into effect on January 1st, 2015.
