1 A proposal to provide education on the proper use of water purification systems.

2
3 **Be it hereby enacted by the General Assembly of the United Nations**

4
5 Justification Clause: Many countries receive new water systems but are not trained on how to use them.
6 Therefore they are unable to operate the systems.

7
8 Section I: To solve this problem we've decided to have the U.N. train the members of groups like Water
9 Steps on how to properly use the water purification systems. Then they will then teach the citizens how to
10 operate the water systems that have been given to them.

11
12 Section II: Only 10.5% of the population connected to water systems receives water on a continuous basis.
13 This goes to show how little water filtration the Dominican Republic gets, and barley half of these people
14 know how to use these filtration systems.

15
16 Section III: The problem is that there's no education on the water purification systems. Also, organizations
17 are willing to donate for the water systems, but they don't have the education on how to work the water
18 purification systems. So they can't teach the citizens on how to work the water systems.

19
20 Section IV: The U.N. will help by teaching people like Water Steps who are going down to the Dominican
21 Republic to teach them how to operate the water purification systems.

22
23 Section V: Our proposal will be funded by the people who installed the water systems. For example, if you
24 were the one who installed the filtration system then it is required for you to educate the citizens of the
25 Dominican Republican how to operate the water system.

26
27 Section VI: This proposal will go into effect in January of 2015.
