1 An act to ensure that the placement of wind turbines is appropriate
2
3 **Be it enacted by the Youth Assembly of the Commonwealth of Kentucky**
4
5 Section 1: ILFN (Infrasound-low frequency noise) is noise less than 20 hertz, usually inaudible to
6 humans. ILFN is perceptible to humans through the other senses besides hearing. Wind
7 turbines create IFLN.
8
9 Section 2: The IFLN produced by wind turbines affects brain activity and can cause
10 large amounts of stress on the body. Thus, the location of wind turbines must be at least 30 miles
11 away from schools or areas with large populations.
12
13 Section 3: To eliminate as much of the frequency as possible, lattice absorbent walls will be placed
14 around wind turbines.
15
16 Section 4: The cost of the movement of current turbines will be placed on the companies who put
17 the turbines in place; however, there will be no tax forced upon the companies for the
18 project. After the current turbines have been moved, there will be no cost for the inaction of this bill.
19 The
20 law will stand for a guideline.
21
22 Section 5: After passed, companies will have a 5 month grace period to move turbines accordingly.
23
24 Section 6: The bill will become a law the day it is passed.
