1 An act to regulate and license the use of medical 3D printers in hospitals

2
3 **Be it enacted by the Youth Assembly of the Commonwealth of Kentucky**

4
5 Section 1: This bill will require the Kentucky Board of Medical Licensure to add 3D printing to the list of
6 practices they regulate. Hospitals that have and use medical 3D printers will have to obtain a license
7 that must be renewed yearly. This license will ensure that the doctors and hospital staff know how to
8 correctly use and maintain the devices.

9
10 Section 2: Any doctors or technicians who operate or maintain the medical 3D printers must have
11 taken a course or be certified in operating and maintaining 3D printers. The course or certification
12 must come from an accredited place of higher education.

13
14 Section 3: Any hospital that utilizes a medical 3D printer for any medical purpose (i.e. printing medicine,
15 tools, and organs) must have a license to operate it. The license will be issued by the KBML, and the 3D
16 printing space must be inspected by a member from the KBML on an annual basis, which will constitute
17 the renewal of the license.

18
19 Section 4: Offenses will comply with KBML protocol and are as follows:

- 20 • First offense: For the first offense (i.e. a 3D printer is not licensed or an operator is not
21 certified), the hospital will be fined \$15,000.
22 • Subsequent offenses: For any subsequent offenses that occur, the case will be subject to review
23 and penalties will be levied by the KBML.
24

25 Section Five: This bill will go into effect on January 1, 2017.
